Rechargeable Bike Light Set  
with charging case

TAIPEI CYCLE  
d&i awards 2024  
by   
GOLD

## Jury Statement

The Proton bike lighting is a very thought-through solution, with a very easy and user-friendly charging solution in the combination of storage and minimal maintenance. Nice to avoid double wires. The size of the lights fits perfectly in your bag or in your pocket, easy for transportation and storage. It gives a fine level of light to be seen and to see the road. The mounting is easy on the bike with a simple rubber strip, and the attachment of the lights is very easy with the strong magnet. The understated design is nice and elegant with good details and fits perfectly on most bicycles.

### Compact Bike Light Set with charging case

Introducing the Lumixell Proton - A powerful and versatile bike light set that charges on the go and fits in your pocket! Much like how AirPods cases charge AirPods, the Lumixell Proton has a compact case that charges each light on the go. The best part? Both lights and charger are the size of a bluetooth earbuds case. Each set comes with both front and taillight, alongside multiple mounting accessories for different mounting options. You can attach each proton by using our magnetic coupling mounting strap, which securely snaps and locks each light onto your bike. All your needs in one small pocketable case, ensuring a safe journey down any road.

- + **Unique Magnetic Self-locking Coupling Strap** compatible with front handlebar / back seat post / saddle bag / saddle mount / bike helmet
- + **Ultra Slim Spot and Wide Vision Optical Design** for wide visibility range
- + **3 LED with different light modes** (including Daytime Running Light) cater to your visibility needs both day and night.
- + **Charge by either charging case or via Type-C cable.**
- + **Water Resist IPX4**
